

Green Plants for Green Buildings

Exotic Plants

Why have plants?

- Plants are Healthy - they reduce airborne molds & bacteria.
- Plants Remove Toxins from the air.
- Plants are inviting - they soften the ambience in offices and firms.
- Plants break up large areas in conference centers.
- Plants act as sound absorbers & lower stress in the workplace.

Studies by NASA have proved how effective plants are at ensuring you live and work in a healthy environment. Not only do plants make you feel good, they do you good. As one of the premiere providers of expert interior plantscape design and services in Northern California, our range of services caters from the smallest of intimate restaurants and condominiums, to weddings, mansions, and the largest of corporate offices and convention centers.
